Professional Experience

Optisoft Vision [\[Recommendation Letter\]](#) *React JS Software Developer* | Jun 2024 – Aug 2024

- Engineered 12+ modular React/Vite components across EyeCloud, Lensoui, and HelpHub enterprise web applications.
- Integrated REST APIs with asynchronous state handling, reducing UI render latency and improving data synchronization.
- Resolved 25+ critical cross-browser rendering inconsistencies and participated in structured production sprint deployments.

Vinayak Soft Solutions [\[Recommendation Letter\]](#) *App Developer Intern* | Nov 2024 – Mar 2025

- Developed cross-platform mobile apps with React Native and Expo; built an offline-first POS system for restaurants to capture table orders.
- Built a real-time Business Insights analytics dashboard delivering sales, inventory, and performance metrics for local businesses.

WebGyor Technologies [\[Recommendation Letter\]](#) *WordPress Developer* | Jun 2022 – Aug 2022

- Developed responsive client web portals (Portfolio Analyst, Employee Track, Account Management); improved page speed by 35%.

Ayika Foundation [\[Offer Letter\]](#) *IT Intern* | Aug 2022 – Aug 2023

- Directed IT digital initiatives and content distribution workflows for environmental campaigns, reaching 10,000+ community members.

Featured Projects & Founder Ventures

Velaar – AI Educational Platform [Live Demo](#) | React 19, Gemini AI, Supabase, RAG, Express

- Architected an AI edtech copilot platform using Gemini 1.5 Pro and a Supabase pgvector RAG pipeline to generate curriculum-grounded lesson plans and Bloom's taxonomy question banks, substantially reducing teacher preparation time.
- Engineered an automated Topic-to-Presentation PowerPoint slide generator and real-time QR attendance verification system with JWT auth and role-based access control across teacher, student, admin, and parent portals.

Hasslefree Drive – On-Demand Driver Booking App [Live Site](#) | Flutter, Dart, REST API, Google Maps

- Built dual-sided driver booking application with real-time GPS tracking via Google Maps API, automated tiered fare estimation, and scalable REST API backend with JWT authentication and push notifications (currently in launch phase).

Handwrite (2024–25): Built and launched SaaS product to **180+ users** automating handwritten assignments (1,200+ pages rendered, Razorpay credit packs); retired platform after analyzing compute unit economics — gained firsthand founder experience in CAC, feedback loops, and cost optimization.

Freelance Web Engineering (2023–24): Delivered 3 commercial client sites (**ATM Promo**, **Prime Financials**, **Barter Tech**) using WordPress, PHP, and Bootstrap; achieved 95+ Core Web Vitals, improved load speeds by 40%, and integrated lead capture funnels.
